Carburetor Inlet Kits for Holley and Demon Carburetors

All Professional Products Carb Inlet Kits come with a -8AN male fitting for the fuel inlet line hookup. If you need to use -6AN or a slip-on hose fitting, use our #10450 Carb Inlet Adapter in conjunction with your choice of any of our three hose fittings or our -6AN fitting. See illustration at above.

#10400

Professional Products Carb Inlet Kit Fits Holley 4150 Carbs with 7/8"-20 threads and 9-3/8" inlet spacing (Will not fit 4010 or 4011 carbs)

#10401

Professional Products Carb Inlet Kit Fits Holley 4500 Dominator Carbs with 7/8"-20 threads and 11-1/4" inlet spacing

#10402

Professional Products Carb Inlet Kit Fits Demon Carbs with 9/16"-24 threads and 9-5/8" inlet spacing

#10403

Professional Products Carb Inlet Kit. Fits Holley 4160 Carbs with center hung floats and 7/8"-20 threads (after removing 5/8-18 fitting) and 8.80" inlet spacing. (Will not fit 4010 or 4011 carbs) Typically used on Holley 60-600 thru 60-607, all 3310's, and 80508's.

This inlet kit fits only Holley 4160 models with center hung float bowls. These carburetors typically have a brass inlet fitting that accepts 5/8-18 inverted flare fittings. Remove these brass fittings and thread the Professional Products Inlet Kit directly into the carburetor bowls. We recommend that an inline fuel filter also be used with this Inlet Kit. See our catalog or web site for a wide range of inexpensive inline filters.
